# COVID-19 RELIEF -CHANDIGARH

COVID-19  
RELIEF REPORT

JULY 2021

## OVERVIEW

The resurgence of COVID-19 was impacting all of our lives, and especially those who do not have any social safety nets. This resurgence was worse and severe and our nation was in deep crisis. There were fear and anxiety all around and the only way to curb the virus was masking up, maintaining social distancing, zero contact, and building immunity.

Food and hygiene kits, life saving medical equipments were all equally critical for prevention and potentially saving lives at the hour. As we fought back the second wave of COVID-19 and were hoping that the wave will sharply decrease in a matter of time, we needed to ensure self-well-being and spare a thought for the wellbeing of the ones in need and vulnerable ones who lack access to emergency healthcare and have their livelihoods affected once again.

Families were in dire need at that hour. This was just when livelihoods began to pick up with the decline of the first wave. The pressing need of the hour was to ensure basic social and economic security be supported for their basic meals, hygiene and access to medicines and healthcare to everyone in need.

## OBJECTIVE OF THE RESPONSE

To provide COVID-19 Food Relief Kit to 817 COVID-19 affected families & children & their families from the low income sector. Together with Fuel a Dream, we distributed **817 ration kits** to not just fill stomachs but also, make sure adequate and critical nutritional needs are met during the crisis.

The only silver lining during this grave crisis has been how we were able to work with stakeholders to identify food insecurity hotspots and mobilize resources for emergency hunger relief and deliver the life saving needs well on time.

The pictures of the relief carried out can be viewed and downloaded from the link:
